

# Arrests Codebook

## Arrests

- **date**: Date of the arrest in YYYY-MM-DD format.
- **hour**: Hour of the day when the arrest took place rounded to the nearest hour in military time.
- **crime\_code**: The suspected crime type causing the arrest.
- **statute\_description**: More detailed categories describing what specific statute was suspected to have been violated.
- **lat**: Latitude of the arrest.
- **lon**: Longitude of the arrest.
- **district**: Police district where the arrest took place.
- **civ.race**: Race of the civilian.
- **civ.gender**: Sex of the civilian.
- **civ.age**: Age of the civilian at the time of the stop.
- **arrest\_id**: Identifier for each arrest.
- **officer\_id**: Unique identifier for each officer.
- **month**: Month of the arrest in YYYY-MM-DD format. The day is always the first day of the month.
- **civilian\_race\_short**: Collapsed version of **civ.race** (less categories).
- **time**: Column created by Risi which combines the date and hour to create a datetime in the YYYY-MM-DD HH format.
- **officer\_arrest\_id**: Column created by Risi for uniquely identifying each observation in the arrest table.
- The unit of analysis is a unique officer involved in an arrest. Each row can be uniquely identified by **officer\_id** and **arrest\_id** or **officer\_arrest\_id**.
- Each arrest involves only one civilian, but they can involve multiple officers. It is possible multiple arrests are all a part of one larger incident involving multiple civilians. This can be investigated by examining arrests that took place in the same location at the same time involving the same officers.
- **Number of rows**: 321872
- **Number of unique arrests**: 164802
- **Number of unique officers**: 8369

“Arrests for municipal code violations and outstanding warrants are categorized as ‘other’”. page 8 of Appendix Section S1.5 in Ba et al. 2021.
